

General Tips for Successful Computing

Computers can be frustrating - don't let this be you!

➤ Go slowly

- If something's not working, be patient before you click again
 - If it doesn't open, try opening it again
 - If you're not sure, don't click on it
 - If it's not opening properly, try closing and reopening it
- Never click anything without reading and knowing what you're clicking on
 - Find a computer 'buddy' to practice with – ask lots of questions
 - If all else fails, restart the computer
 - **Your intuition is your best bet for success**
 - **Computers are not as smart as you!**
